

Long Term Care

Geriatrics & Extended Care (GEC) Service provides a range of health care services from institutional-based care and ambulatory care to community-based care for veterans (especially the

aging) with multiple, chronic health problems. GEC services are provided in collaboration between GEC staff and other departments, including Nursing, Social Work, Nutrition & Food and Medical Administration.

Dallas VAMC

GEC provides care in the Home of the Brave Community Living Center (CLC). CLC promotes the highest possible level of patient independence and well being using a team approach to patient care ensuring the patient's dignity, quality of life and care during their stay. It is the goal of the CLC to place the patient in the appropriate environment based on the patient's needs.

CLC provides:

- Palliative/Hospice Care
- Respite Care
- Rehabilitation Care
- Temporary Placement
- Wound Care

Home and Community Based Care (H&CBC) programs share the goal to provide compassionate care to veterans at home and in the community, promoting maximal independence and support of the caregiver. The H&CBC programs include:

- Contract Home Care
- Home Based Primary Care (HBPC)

Contract Adult Day Health Care (ADHC) and Contract Nursing Home Care (CNH) are extensions of GEC programs managed by Social Work Service.

Sam Rayburn Memorial Veterans Center, Bonham

A Community Living Center is also available at Bonham to provide a long-term care environment for eligible veterans requiring rehabilitative and maintenance care based on the patient's individual needs. CLC strives to ensure that patients receive a sense of dignity, quality of life and quality of care during their stay.

CLC includes:

- Long-term Care
- Palliative/Hospice
- Respite Care
- Restorative/Rehabilitation Care
- Dementia Special Care
- Assisted Care

The [Casper State Veterans Home](#) is located adjacent to the facility and provides another venue for nursing home care for eligible veterans.

Fort Worth Outpatient Clinic

HBPC services are available from the clinic.
